 - Doing the dishes

Special Experiences

MálagaJam 2023

Through an excellence program in the 2nd year of my course at GLU, me and 5 other students went to Málaga Spain. To take place in the Global Game Jam, where I and (Spanish) students had to make a game within 48 hours. This was such a nice and educational experience for me since it was in a completely different environment than what I'm used to which led to me learning a lot about the game industry, working together and under a client.

GLU

During my course at GLU, I often helped as an Student-Intaker during the Open door days, Information evenings, and "GLUren bij het GLU". Which welcomes new students and their parents to the school and allows questions to be asked directly to students in which my rol was to welcome said students and parents, answer their question about the course and show my work that I made whilst there and how I experience the course. If need I would also help the teacher. During these activities I learned how to to really ground myself as a person and confindently express myself, and adapt myself to the situation
